

Germany Joins the Next Wave of E-Invoicing

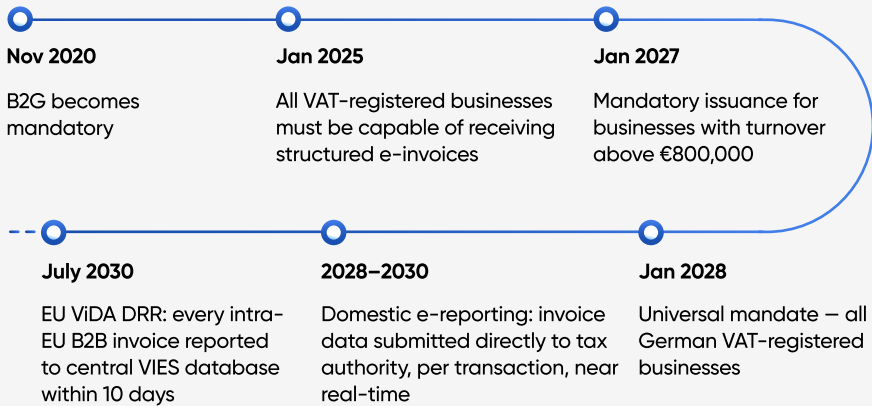

E-invoicing is live. E-reporting is coming.
ViDA follows in 2030. One platform to
carry you through all three.

Four Phases. One Direction. No Room to Wait.

Germany's e-invoicing mandate is already in force – and it's the first of three waves. Reception is mandatory today. Issuance phases in through 2028. Domestic e-reporting follows, written into Germany's coalition agreement. And from July 2030, EU ViDA brings mandatory digital reporting requirements across all 27 member states. The platform you choose today needs to hold through all of it.

Get Ready for 2025 and Beyond

ClearTax is built for Global e-invoicing compliance

Trusted. Scalable. Built for the New Tax Era.

50+

Countries with localised compliance, Peppol integration, and tax authority connections

5,000+

Global enterprises trust ClearTax for digital compliance

1Bn+

E-invoices generated annually on the ClearTax platform

\$500B+

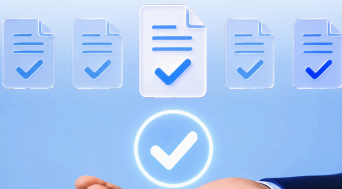

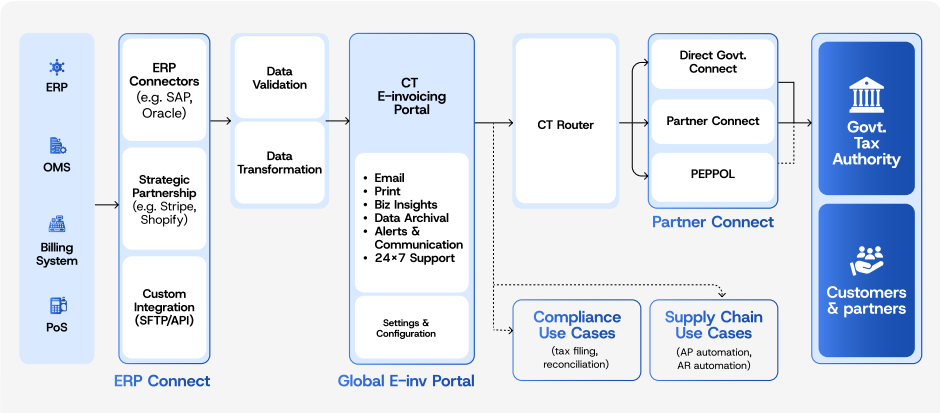

worth invoices processed

Everything the Mandate Demands. Nothing Left to Chance.

-  **E-Invoicing Compliance, End to End:** Structured invoice transmission via Peppol, EDI, or email – validated, tracked, and archived for 8 years under §147 AO GoBD.
-  **XRechnung, ZUGFeRD & Peppol BIS 3.0:** Every accepted format supported. EN 16931-compliant across all domestic B2B and B2G requirements.
-  **Certified Peppol Access Point:** ClearTax is a certified Peppol Access Point, fully compliant with Peppol BIS Billing 3.0 and recognised for cross-border e-invoicing.
-  **Certified ERP Connectivity:** Certified connectors for SAP, Oracle, Microsoft Dynamics, and more. AI-led mapping.
-  **No Invoice Falls Through:** Germany has no mandated platform – invoices arrive via Peppol, EDI, and email. ClearTax unifies all three channels in a single dashboard. Every supplier, every format, every transaction tracked and auditable.
-  **€5,000 Per Invoice. Per Failure.** Non-issuance means no invoice. VAT deduction denied. Late interest at 6% p.a. And fines run per invoice – not per incident. ClearTax runs deep validations and auto-heals failures before they compound into material exposure.

One Platform. Every Invoice Sent and Received.

AR and AP. Peppol, EDI, and email. One status view.

Why Global Enterprises Choose ClearTax

- | | |
|--|---|
|  Enterprise-Grade Scalability Built for high-volume, multi-entity, multi-country invoicing. Processing up to 10,000 invoices per second. |  Govt-Grade Security ISO 27001:2022, ISO 22301:2019, SOC 2, GDPR-compliant. Hosted on AWS Europe with AES-256 encryption, multi-AZ hosting, and local data residency. |
