Empowering Your E-invoicing Compliance Journey

Stay Ahead of Fawtara. Stay Fully Compliant.

Are You Ready for Fawtara?

Oman is rolling out mandatory e-invoicing under the Fawtara, transforming how businesses generate, validate, and report invoices. This is not a simple format change; it's a **real-time compliance system** requiring the following:

- Structured invoice formats (XML/UBL/JSON)
- Integration with Accredited Service Provider (ASP)
- Continuous reporting to the Oman Tax Authority

Oman e-Invoicing Mandate: Key Implementation Timelines

August 2026:

Mandatory for the top 100 taxpayers selected by OTA. These businesses must issue and receive e-invoices via the Fawtara platform.

Feb 2027:

Expands mandate to other large taxpayers not included in Phase 1, based on turnover thresholds.

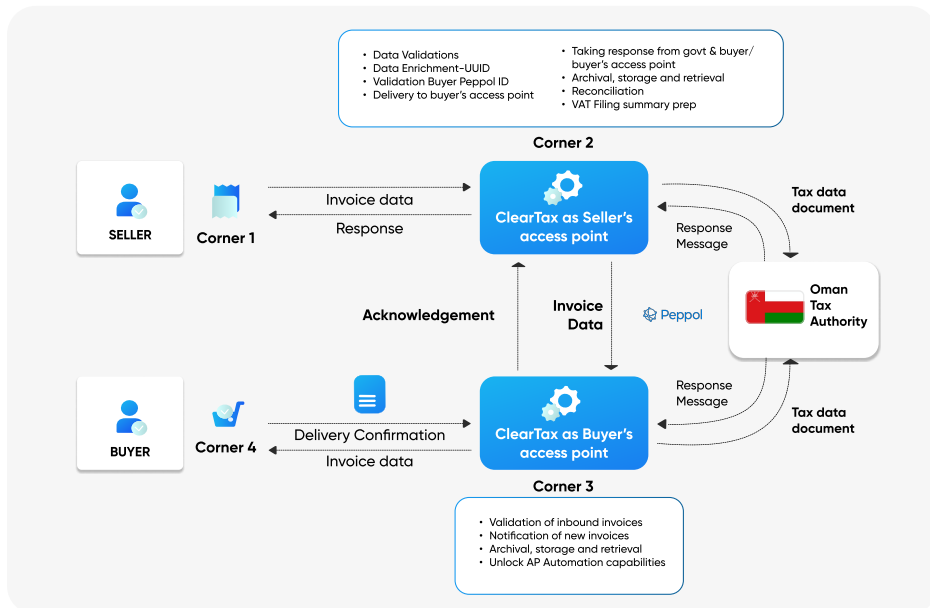

August 2027:

Applies to all remaining VAT-registered businesses, including small and medium enterprises.

2028:

Mandatory for government entities. All B2G transactions must be conducted using e-invoices; public bodies must accept them via the Fawtara system.

Oman E-invoicing DCTCE model

Key Requirements You Must Comply With

Transmission model

Decentralised
5-corner model
(Fawtara).

Transmission methods

All invoices must be transmitted
via an OTA-accredited
Service Provider.

Acceptable formats

Invoices must be issued in XML or PDF/
A-3 format. A digital certificate is required
to ensure reliability and verification.

Applicability

All VAT-registered businesses in Oman.
VAT group members must each follow
e-invoicing procedures and share
a single service provider.

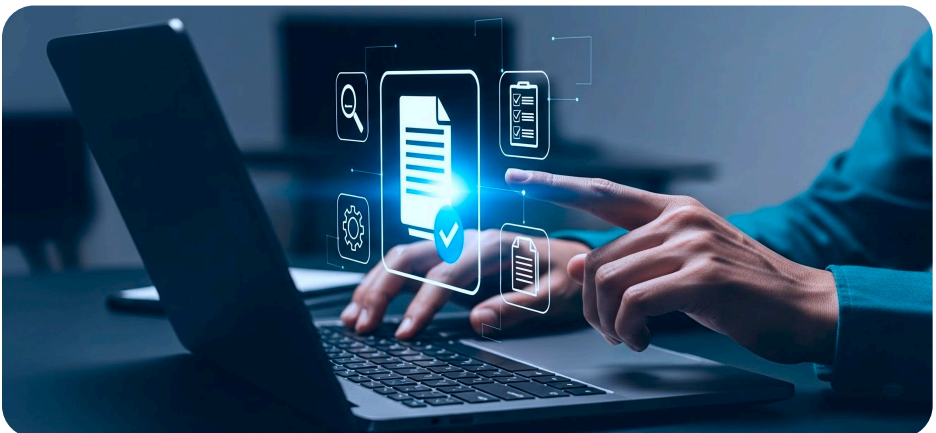

Archival

Invoices must be archived for 10 years
– 5 years in the system and 5
years in an electronic archive.

Penalties

Penalties will be applied according to
regulations for non-compliance, with a
grace period before enforcement.
